PROJECTS & COMPETITIONS

Bloomberg Global Trading Competition 09/24 – 11/24

- Collaborated with a team of five to manage a \$1 million portfolio over six weeks using the Bloomberg Terminal, employing strategies such as risk parity, and earnings revisions.
- Ranked in the top 20% globally out of 10,000 participants from 46 countries. [View the Certificate](#)

IMDB Analysis: Python, Numpy, Pandas, Seaborn, SQL, PySpark, AWS, EC2, Jupyter Notebook 02/23 – 05/24

- Analyzed IMDB datasets with 86 million rows to generate insights on actors, directors, historical movies, and job categories, creating data visualizations to answer key industry questions. [View the GitHub Repo](#)

EXPERIENCE

Full Stack Solutions | New York, NY | *Technical Sourcer (Talent Acquisition)* 05/17 – 11/22

- Sourced candidates for diverse technical roles, such as software engineers, quantitative strategists, and DevOps professionals, for top-tier quantitative hedge funds and firms, including Citadel, D.E Shaw, Two Sigma and Bloomberg
- Sent approximately 100 InMails daily, leading to 10 phone screens per day and an average of two successful candidate placements per month. Played a key role in attracting talent across Bloomberg divisions, earning recognition with an invitation to the Bloomberg Recruiter Awards ceremony
- Surpassed performance metrics by placing highly skilled talent in specialized roles, driving a ~50% revenue increase per placement within top divisions
- Utilized innovative sourcing techniques, including web scraping with GitHub API, Stack Overflow Talent, and LinkedIn Recruiter, to efficiently identify and contact top-tier candidates
- Engineered automated email workflows using Google Sheets and integrated scraped candidate data, improving outreach efficiency and reducing company costs by ~20%, illustrating problem solving and technical aptitude
